## 14" Industrial Micro Additive Micro Factory 4.0

By FARM-3D

- First intervention
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Reconstruction of physical and cyber infrastructure
- Medical support, physical and mental reconstruction, post-life human treatment

Our 14" Micro-Factory for Industrial Additive Manufacturing 4.0 is versatile, designed for aero and shipboard deployment in isolated, extreme, or hostile environments. This rapid-deployment, mobile unit excels in repairing and reconstructing infrastructure, equipment, and personnel using industrial-grade 3D printing. Its integrated technology handles additive manufacturing, quality monitoring, and production control, addressing the urgent needs arising from natural disasters, humanitarian, health, environmental, and technological crises.

## 45m Telescopic Tower Vehicle - Military

By GEMCO MOBILE SAFETY BV

- Preparation and anticipation of mission
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Reconstruction of physical and cyber infrastructure

GEMCO developed and build this extremely stable unguyed mobile mast with a height of 45m for use in harsh densely wooded forest environments in Northern Europe. The mast is able to carry a minimum top load of 200 kg, it can operate in a temperature range of -40°C to +45°C, provide stability of max. 2° @ wind load of 30 m/s, and it is climbable as well. The fully self-supporting C41STAR- and wireless communication support vehicles and systems are applicable under all circumstances when tactical and/or critical communication or critical mission support is required.

## 6" Chemlight (15cm) Military Grade lightstick

By CYALUME TECHNOLOGIES SAS

• First intervention

Proven effective by military forces worldwide for over 50 years, ChemLights enhance both nighttime tactical operations and training safety. With a patented phthalate-free formulation, they are non-flammable both before and after activation, maintenance-free, non-toxic, and waterproof. They produce no sparks or flames. Recommended for start lines, drop zones, and hazard markers. Perfect for survival, first aid, and evacuation kits. Individually foil-wrapped for light/moisture protection with legal notices in French and English.

## NANUK

## 940 EMS Kit

By Nanuk by Plasticase Inc.

• Medical support, physical and mental reconstruction, post-life human treatment

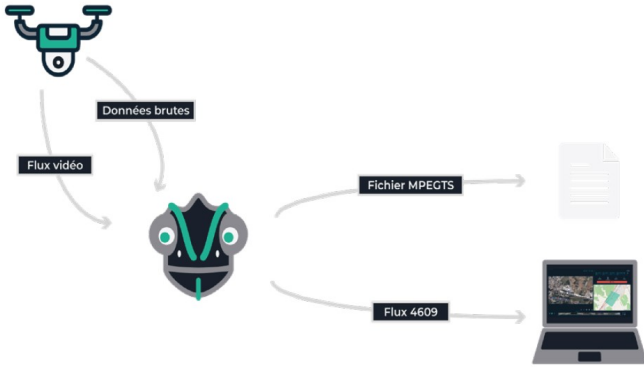

Organizes and protects critical EMS equipment from the elements, drops, and all the challenges that emergency calls present. This case is waterproof, dustproof, impenetrable and indestructible NK-7 resin shell and stays shut tight with its PowerClaw superior latching system. Built to organize, protect, carry and survive tough conditions and perfect for transporting medical equipment.

# Add the power of the 4609 standard to your equipments

By MAGELLIUM

- First intervention
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)

The STANAG 4609 combines the video stream and metadata from the parameters of the on-board sensors (GPS, IMU, etc.) and the results of algorithms applied to the video stream (position and speed of the detected targets). Many drones, particularly from the civil industry, widely used for defense and security are not compatible with this standard. Our chameleon box remedies this deficiency by putting the video in NATO format (stream or file) and thus allows the integration of any opportunity sensor, present in the area, into the local and central chain of command.

## Airstar balloon 12 300 lumens Pro-Pack 48V LED

By CDE PROLUTECH

- Preparation and anticipation of mission
- First intervention
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Shelter and rest, human support
- Reconstruction of physical and cyber infrastructure

The Airstar 12x10w LED Pro Pack lighting balloon is a powerful, self-contained, on-board LED lighting device, all in one. This powerful balloon is perfectly suited for all types of applications to respond to crises: temporary lighting, area lighting, safety lighting, emergency lighting, lighting in confined environments, etc.

**SPECIFICATIONS**  
 :Diameter: 60 cm  
 Lamp wattage: 12 lamps of 10w LED each  
 Lamp life: 40,000h  
 48v lithium battery  
 Autonomy: 4 to 12h  
 Weight: 20Kg  
 Color temperature: 4,750°K  
 Lighting up to 700m<sup>2</sup>

## Airstar Redtech 1000 Sirocco 99 000 lumens

By CDE PROLUTECH

- Preparation and anticipation of mission
- First intervention
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Shelter and rest, human support
- Reconstruction of physical and cyber infrastructure

This powerful, connected LED lighting balloon is the perfect solution for crisis situations: temporary lighting, area lighting, emergency lighting, lighting in confined spaces, etc.

18 light sources of 5500 lm  
 Each pixel can be controlled independently  
 Less power consumption for greater lighting efficiency  
 Lighting control with application  
 Lighting area up to 4071 m<sup>2</sup>  
 Power 99000 lumens  
 Color temperature 5000K  
 Average LED lifetime: 50000h  
 Maximum power 700W  
 Wind resistance 100 km/h  
 Weight 8.6 kg

# Proengin

## AP4C – Universal Chemical threat detection kit

By PROENGIN

- Preparation and anticipation of mission
- First intervention
- Projection and mobility

AP4C secures military, and first responders against chemical threats. Highly sensitive, they excel in detecting TICs, CWAs, PBAs, 4th gen & unconventional aerosol/gas threats. Critical for reconnaissance, establishing safety perimeters, triaging CBRN victims, verifying decontamination. Seamlessly integrating protocols, it ensures rapid alerting and decisive action.

## APPI-Com

By APPI TECHNOLOGY

- First intervention
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Subsistence, water treatment, and sanitation
- Reconstruction of physical and cyber infrastructure

APPI-Com is the world's most advanced wireless tactical field communication device: it is a Fully Duplex system allowing Hands-Free communication between team members in dangerous and critical situations where rapid intervention is needed. APPI-Com is easy to use and deploys a secure and coded network, no installation nor base needed. The natural, conference-style communication of the APPI-Com means more efficiency for crisis teams, and the embedded lone worker protection technology assures the security of each individual team member.

## APPI-CovR

## APPI-CovR

By APPI TECHNOLOGY

- First intervention
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Subsistence, water treatment, and sanitation
- Reconstruction of physical and cyber infrastructure

The APPI-CovR embeds a long-range conference radio inside a noise-cancelling headset and offers all of the advantages of APPI-Technology: hands-free communication, a secure and coded network, and built-in lone worker protection. APPI-CovR has a PTT/DUPLEX button that allows for two modes of use and Bluetooth connectivity so you can receive and make phone calls and share them with your team. In dangerous and critical situations where rapid intervention is needed, choose a system with security and simplicity in mind: APPI-CovR.

# Bungalow

By EASYCUBE

- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Shelter and rest, human support
- Reconstruction of physical and cyber infrastructure

The 20ft FlatPack bungalow is an ideal solution for responding to emerging crises. Its projectable, insulated and pre-equipped design provides an effective response to emergency needs. These bungalows can be rapidly deployed in the field, providing a safe and functional shelter in all circumstances. Thanks to their integrated insulation, they guarantee optimum comfort even in extreme conditions. Their pre-equipment facilitates the installation of various installations such as electricity and plumbing, enabling rapid commissioning.

# OUVRY

CBRN protective system

OUVRY®

## CBRN body bag

By OUVRY S.A.S.

- First intervention
- Medical support, physical and mental reconstruction, post-life human treatment

The NRBC body bag allows for the containment and medical evacuation of NRBC-contaminated bodies. It has been designed to prevent cross-contamination during body extraction and ensure pre-decontamination during transport. Made of a flexible material, impermeable to NRBC agents, and highly mechanically resistant. Lightweight and compact, it is easy and quick to deploy. The bag incorporates a hyper-absorbent material, capable of absorbing up to 8L of liquid for adult size and 5L for child size.

Design to protect

## CCFM forest fire tank truck ENSURING PROJECTION AND MOBILITY

By ARMORIC HOLDING / ESSONNE SECURITE

- Preparation and anticipation of mission
- First intervention
- Projection and mobility

Based on a RENAULT chassis, the CCF benefits from all the recognized expertise of SIDES in the field of fire-fighting vehicles. Equipped with a 4000 liter tank, 4X4 vehicle, it meets all civil protection standards, particularly in terms of self-protection. Reliable and robust, suitable for difficult terrain, it has been specially designed to meet the needs of firefighters for the fight against forest fires. A well appreciated product, it equips many French departments.

## CCI-fire tank truck

By ARMORIC HOLDING / ESSONNE SECURITE

- Preparation and anticipation of mission
- First intervention
- Projection and mobility

Based on a RENAULT chassis, the CCI benefits from the recognized expertise of SIDES in the field of fire-fighting vehicles. Easy to use in a tropical environment, very easy to maintain and repair, it has been specially designed for use in difficult environments for extinguishing fires in rural areas. It should also be noted that in a context of humanitarian crisis it can be used for the transport of drinking water.

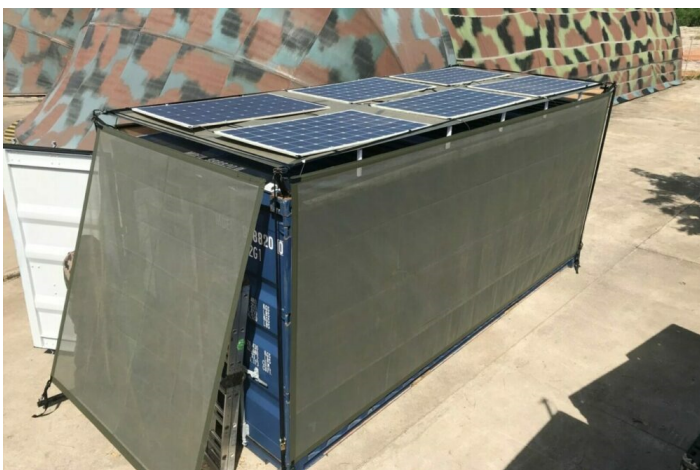

---

## Container with solar panels

By EASYCUBE

- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Shelter and rest, human support
- Reconstruction of physical and cyber infrastructure

Easycube offers an ideal solution in times of crisis, transforming containers into versatile, sustainable spaces. Whether on site or in the workshop, our teams ensure high-quality renovation tailored to your needs. Once transformed, they can be adapted to a variety of uses, providing a rapid and effective response to changing needs in times of crisis. To meet environmental challenges, we integrate solar panels on roofs. This initiative promotes the production of clean, renewable energy, contributing to a more respectful future.

# CONTAINWATT, the mobile solar-powered shelter

By MONKILOWATT

- First intervention
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Shelter and rest, human support

Wherever you are, CONTAINWATT® deploys up to 150m<sup>2</sup> of solar panels at a height of 3 meters, under which shelters can be installed. Mobile, its QuickSolarPlay® system allows for easy and fast installation by 2 people in less than a day. Robust, CONTAINWATT® can be deployed on all types of bungalows or on our specific shelters (tents or semi-rigid kits). Fully pre-wired, CONTAINWATT® is your solar solution for immediate and continuous renewable energy production. A patented, innovative, scalable, and autonomous solution!

## Shelter X

# Cubic tent

By SHELTER X

- Preparation and anticipation of mission
- First intervention
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Shelter and rest, human support

The CUBIC tent is a crisis response solution. Indeed, this module has been designed for rapid deployment in military theaters of operation, in any environment. The CUBIC features technical characteristics that facilitate rapid deployment of this solution, such as low weight, compact volume, low maintenance, and deployment in 20 minutes requiring 2 persons. This module also offers excellent resistance to climatic conditions, particularly wind, and does not require the installation of guy-wires.

## CyPouch tactical holder

By CYALUME TECHNOLOGIES SAS

- Preparation and anticipation of mission
- First intervention
- Projection and mobility
- Shelter and rest, human support

The CYPOUCH was designed to keep 6" and 4" Cyalume sticks protected from light and preserve their operational performance until the stick is activated. These photosensitive products are typically stored in their individual foils. The CyPouch allows operators to do away with these foils, which are removed when the operator prepares their pouch by attaching the sticks to the 3 metal rings inside the pouch. Once the pouch is closed, it can be unzipped at any time to release the sticks in a cluster. Then firmly grasp the lightstick and pull down to release it from its attachment.

## DECONTAMINATION UNIT - HAZMAT SUITS

By GEMCO MOBILE SAFETY BV

- Preparation and anticipation of mission
- First intervention
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Subsistence, water treatment, and sanitation

Units are deployed to support the special services “National Facility for Dismantling” (LFO) and the National Forensic Investigation Team (LTFO), primarily in the dismantling of (former) production sites for synthetic drugs and/or the disposal of chemicals and/or waste materials associated with the production of (synthetic) drugs. But also, when performing forensic investigations at crime scenes where there is a risk for the investigators or environment of chemical, biological, radiological, and/or nuclear contamination. These special interventions are performed by personnel in HAZMAT suits.

# Detect all Novichok agents with Bruker Mass Spectrometers

By BRUKER OPTICS GMBH & CO. KG

- Preparation and anticipation of mission
- First intervention

The Organisation for the Prohibition of Chemical Weapons amended the Annex on Chemicals by introducing a new class of nerve agents known as Novichoks. The OPCW's list includes several hundred compounds, but only the "usual suspects"—specifically A230, A232 & A234—can currently be detected and identified at trace levels using field-deployable tools. However, for all other unknown compounds on the list, these devices remain "blind", posing a risk of false-negative results. Leveraging the capabilities of the E<sup>2</sup>M/MM2 systems, it is now possible to detect all threat-relevant Novichoks in the field.

## ECOS - EXPANDABLE CONTAINER

By NIXUS

- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Shelter and rest, human support

Patented ECOS container is intended for crises where the authority needs to quickly set up a robust and spacious HQ. It can be expanded on each side by a dimension equal to its own length and its perimeter can act as a barrier against water, animals, or other threats. The light roof covering the perimeter is supported by high-pressure inflatable beams. The estimated installation time for 2 trained people is up to 2 hours. Multiple ECOS containers can be connected to each other or integrated with ERA shelters. Windows, evacuation doors, electricity, and water distribution can be included, too.

# Extraction bag for CBRN contaminated victims EVACOPS®

By OUVRY S.A.S.

- First intervention

EVACOPS® enables the medical evacuation of personnel contaminated by CBRN agents while allowing for emergency medical procedures. It provides protection against chemical warfare agents in liquid, vapor, and aerosol form for 48 hours. By containing the contamination, it eliminates the risk of contagion to medical and transportation personnel, as well as the vehicle or aircraft used for victim extraction. Compact and easy to deploy, it is available in child and adult versions, requiring no maintenance or consumables. Milipol 2019 Awards.

# herges detection

herges® Multi-Stick 1000  
for self laboratories (HME)

herges® Multi-Stick 2000  
for self laboratories (HME) & Military explosives

## Fast explosives detection with test strips hergex

By HERGES DETECTION GMBH

- Preparation and anticipation of mission
- First intervention

This test can reliably detect and differentiate within 15 secondes between various explosives such as self-laborates (used most of the time by terrorists) or military explosives. Working with this test, the police forces, private security companies, fire brigades, humanitarian organizations etc. can easily recognize even a very small quantity of explosive, give useful informations to the demining services before their intervention and protect humans very fast. The test is easy to use, has a small size (fits in a clothing pocket) and an attractive pricing.

## FG-P: A Ford Ranger LTV for Crisis Response Operations

By Ford Global Fleet Sales

- Projection and mobility

Le FG-P offre un soutien vital dans les opérations de réponse aux crises et d'aide humanitaire. La mise à niveau de la suspension améliore la stabilité pour naviguer dans des terrains difficiles, permettant une réponse efficace dans des situations d'urgence telles que les catastrophes naturelles ou les menaces sécuritaires. De plus, sa compatibilité avec le carburant à réaction (JP8) offre une polyvalence dans les options de carburant, facilitant la logistique dans les situations d'urgence.

**mirola**™

## FIDO

By MIROLA RESCUE AB

- First intervention
- Shelter and rest, human support
- Medical support, physical and mental reconstruction, post-life human treatment

FIDO: is a closed-circuit oxygen rebreathing device for acute, in-field oxygen treatment that was created to replace old, cumbersome free-flowing oxygen systems with large cylinders. Due to its design as a closed-circuit re-breathing device, FIDO uses O2 very efficiently, employing a significantly smaller oxygen bottle without compromising quality or output. FIDO is four times smaller and 90% lighter than existing systems on the global market, with double the run time. As a comparison; with a 5-liter gas cylinder and 200 bar, FIDO can provide continuous 12-hour treatment.

# Filtralife solution, Instantly transform your water into a drinkable solution.

By FILTRALIFE SOLUTION

- Preparation and anticipation of mission
- First intervention
- Projection and mobility
- Shelter and rest, human support
- Subsistence, water treatment, and sanitation

Filtralife transforms any type of water into drinking water. Ensure a reliable water supply with our portable and mechanical solution, capable of making almost all surface waters drinkable without using chemicals, electricity, or electronics. This system can treat up to 1000 liters per hour. Benefit from a sustainable and reliable solution. A simple monthly cleaning is enough to maintain your tool at its peak performance over several years. Certified by an approved laboratory of the Ministry of Public Health.

# FR4000 K-Light LED multifunction lamp

By CDE PROLUTECH

- Preparation and anticipation of mission
- First intervention
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Shelter and rest, human support
- Reconstruction of physical and cyber infrastructure

Surprisingly powerful thanks to its CREE XHP70.2/TIR LED, this lamp offers brightness of up to 4000 lumens. Powered by a 21700 Li-ion battery, it can be recharged with a magnetic USB charger. The FR4000 is ultra-resistant, submersible to 10 meters, and particularly compact and lightweight. What's more, thanks to its powerful built-in magnet, it can be attached to any magnetic support. It can be adapted to meet all your requirements. This lamp offers a wide range of applications: torch, headlamp, etc.

# GLOBAL LINK RESCUE - AERIAL FIRE FIGHTING

By AD-WAIBE

- Preparation and anticipation of mission
- First intervention
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)

"Global Link Rescue Aerial Fire Fighting" is a system enabling communication among all stakeholders in an aerial firefighting mission: crisis centers, firefighters, helicopters, and airplanes. It includes on-tablet chat messaging, digital mapping with tactical situation awareness, Blue Force Tracking, and predefined messages: airplanes transmit their flight situation and retrieve ground SITAC data. The portable system operates autonomously via GSM or satellite and is currently used by all civil security aircraft.

## KC10 UAV cockpit power supply container

By NOVAKAMP

• Preparation and anticipation of mission  
• Projection and mobility  
• Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)

NOVAE has designed a turnkey solution for powering surveillance drones: this solution, comprising inverters and transformers, provides high-quality, uninterrupted power supply. The equipment operates in optimal conditions, whatever the site (cold/hot, humidity, dust, etc.). On-site commissioning is quick and easy (no qualified personnel required). This containerized solution enables all UAVs (cockpits and air conditioners, antenna, satellite) to be connected to a main electrical network. NOVAE can also provide training for users.

# Lambda Autonomous Surveillance Tower (LAST)

By LAMBDA AUTOMATA

- Preparation and anticipation of mission
- First intervention

The LAST accurately detects and geo-locates people, vessels, vehicles and smoke. Using AI, it assigns geographic coordinates to image information, and classifies detected objects or events of interest without using active sensors like radar or laser rangefinders. Fully operational for land and coastal border monitoring, as well as forest protection. With a mission oriented user interface, seamlessly command and control vast fleets of cameras using an intuitive map.

NUTRITION TO SURVIVE®

**EMERGENCY FOOD**

# LONG-LIFE CAN - 25 YEARS

By NUTRIDRY

- Preparation and anticipation of mission
- Shelter and rest, human support

Discover our long-life tins, the fruit of three skills combined to preserve both taste and quality. With our expertise in cooking and combining flavours, freeze-drying and appertisation, we guarantee an unrivalled taste experience. Available in two ultra-practical, resealable and easy-to-store formats (community and family), our preserves are perfect for taking with you wherever you go, while retaining their freshness and authentic flavours.

## LONG-LIFE WATER - 15 YEARS

By NUTRIDRY

- Preparation and anticipation of mission
- Shelter and rest, human support

Discover our Pyrenean water, a natural mineral water captured at an altitude of 1332 m. Treated for optimum purity, it is packaged in practical 50cl cans. With a shelf life of 15 years, this water will keep you refreshed and reliably hydrated, wherever you are.

## Mass Decontamination Unit

By GEMCO MOBILE SAFETY BV

- Preparation and anticipation of mission
- First intervention
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)
- Shelter and rest, human support
- Medical support, physical and mental reconstruction, post-life human treatment

This Gemco CBRN Mass Decontamination unit is a fully self-supporting “wash street” for people that have been affected by chemical, biological, radioactive or nuclear exposure. The Decontamination unit is specially designed for hazardous material disasters when rapid response and intervention is required for urgent mass decontamination in the case of CBRN attacks or epidemics. The unit is fully self-supporting. It is fitted out with all of necessary equipment and materials needed during this type of emergency. The mass decontaminations systems have a capacity of > 65 persons/hr.

## Motorised floating bridge

By S2M EQUIPMENT

- Projection and mobility
- Reconstruction of physical and cyber infrastructure

Used for civilian or military purposes, both as a continuous bridge and a ferry, the P.F.M. allows heavy equipment to cross rivers with a simple and rapid deployment. It consists of 10-meter long modules which, when assembled, form a continuous floating beam. Each module is powered by two outboard motors. On land, the module is transported on a special semi-trailer for deployment and launching. The same type of semi-trailer is used for transporting and setting up the end ramps.

## NIXUS MOBILE FIELD HOSPITAL

By NIXUS

- Shelter and rest, human support
- Medical support, physical and mental reconstruction, post-life human treatment

NIXUS field hospitals can be set up in hours and serve during conflicts or unexpected catastrophic situations that require a spacious portable hospital of ROLE1 or ROLE2 level that can be operational almost immediately. The go-to solution for the structure is a patented and incredibly portable one-piece FOLD metal frame or high-pressure inflatable ERA structure that can be transported in a regular vehicle. The tents can be interconnected and form compact modules. Professional medical equipment can be integrated into the interior.

# Overflow area real time mosaicing

By MAGELLIUM

- Preparation and anticipation of mission
- Projection and mobility

This service transforms a standard NATO STANAG4609 video stream into ortho-rectified mosaics of the hovered area. By selecting key frames from the video stream, it ortho-rectifies and merges them to create georeferenced ortho-images compatible with any GIS system. These orthoimages can be used to detect changes between a baseline and the present moment, or to geolocate important features such as forest fires. All the data produced (georeferenced images, areas of interest detected) can be used directly by a C2 or a GIS.

By CTECH

• Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)

Scofus by CTech is a crisis response solution that revolutionizes communication in critical situations. It fuses different channels into one broadband channel, ensuring uninterrupted connectivity. Scofus strengthens surveillance towers, unmanned vehicles, and military applications with BVLOS integrated seamless communication. It provides increased bandwidth, low-delay data transmission, high-quality video streaming, and autonomous control. Scofus combines SATCOM, RF Radio-link, cellular, and more for secure and efficient communication. Learn more at Scofus - CTech.

# SecureARX

## SecureARX

By CTECH

• Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)

SecureARX is a critical crisis product, providing robust and secure satellite communication for military and government applications. It ensures reliable and jamming-resistant communication in challenging environments, supporting forces, government organizations, and emergency operations. With advanced features and flexible deployment options, SecureARX is essential for maintaining secure and reliable communication links during crises.

# SHERPA 4X4 PRO / ENSURING PROJECTION AND MOBILITY

By ARMORIC HOLDING / ESSONNE SECURITE

- Preparation and anticipation of mission
- First intervention
- Projection and mobility

This vehicle in the Reinforced Occupant Protection version, combines a high performance capability of extinguishing aircraft and other equipment fires or any other engine with a very high level of occupant protection thanks to its armored cabin. Presented with a SCANIA cabin, it was developed by the ARMORIC HOLDING's group company SIDES, a well-known specialist in fire-fighting vehicles and ESSONNE security, expert in armoring, which has demonstrated its know-how notably through the vehicle CARAPACE deployed in OPEX. The SHERPA is perfectly suited to airport fire safety in hostile environments

## Proengin

# SIMTOOL KIT

By PROENGIN

- Preparation and anticipation of mission
- First intervention
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)

Forces need a rapid deployable detection system during crises like accidents, disasters, conflicts. SIMTOOL KIT wirelessly networks AP4C devices into a mobile protection system. Strategically positioning detectors allow oversight of broad perimeter via a tablet - real-time data/mapping for enhances situational awareness & faster. Ideal for site security, events, safety bubbles and perimeters, this solution extends our technology for system-wide protection.

bodyarmor  
R E C Y C L E R

## single use blankets

By BODY ARMOR RECYCLER

• Shelter and rest, human support

• Single & short-term use blankets • Water repellant polypropylene cover filled with recycled fibers (cotton blends or flame-retardant fibers). • Possibility to recycle used uniforms into filler fibers mix, through a safe demilitarization program. • 2 sizes available • Made in France • High production capacity

SkyARX

## SkyARX KU-18

By CTECH

• Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)

The SkyARX Ku-18 Terminal by CTech is a crisis response solution, providing essential communication during emergencies. With high-speed data transmission, secure video streaming, and reliable connectivity, it enables real-time coordination and decision-making. Lightweight and compliant with industry standards, it ensures secure and efficient communication in challenging environments. The SkyARX Ku-18 Terminal is a reliable solution for crisis response.

# SOS survival signal light

By CYALUME TECHNOLOGIES SAS

- Preparation and anticipation of mission
- First intervention
- Projection and mobility
- Shelter and rest, human support

The SOS is a lightstick provided with a cord. When activated, it becomes a particularly practical survival signal light. By spinning its handle, a light circle is formed, visible at up to 1 mile (1.6 km) on land/sea level, and 3 miles (4.8 km) from the sky. These circles of light are visible up to 1.6 km at ground level and 4.8 km from the sky. Location is facilitated and the position made more visible and easily recognized for search and rescue operations. This survival signal light is useful as an emergency light, distress light, means of airborne and horizontal identification lighting.

# SpaceKnow: GUARDIAN

By SPACEKNOW

- Preparation and anticipation of mission
- Projection and mobility
- Subsistence, water treatment, and sanitation

SpaceKnow Guardian provides an AI-driven software solution for satellite imagery analysis, ideal for environmental monitoring. It supports optical and SAR data for real-time, weather-independent processing. Key capabilities include tracking forest health, monitoring subsidence, and identifying areas affected by floods, wildfires, and droughts. It also detects deforestation hotspots and measures environmental efforts, all through a user-friendly platform that requires no prior experience.

# Station of mobile drinking water

By PRONAL

• Subsistence, water treatment, and sanitation

Our mobile water purification stations will enable thousands of people to access water, with a capacity of 5000 liters per hour. Water sourced from rivers, ponds, or flooded areas is first pre-filtered to remove large debris (plastics, twigs, dead leaves) before undergoing three levels of filtration (200 MICRON, 50 MICRON, 0.015µm) to ensure it is clear and drinkable. The purified water is then distributed to the population and stored in flexible tanks designed for drinking water.

# STEPHAN EVE TR MILITARY ICU AND TRANSPORT VENTILATOR

By FRITZ STEPHAN GMBH

• Medical support, physical and mental reconstruction, post-life human treatment

Military transport and ICU ventilator. In rescue situations, every second counts: that is why we have designed EVE for transport purposes – EVE TR – so that PEEP ventilation, for example, can be activated at the push of a button within a very short time. For both premature and newborn infants and older children as well as adult patients. Small but powerful, this particularly applies to EVE TR. It is compact, easy-to-use and equipped to function autonomously

# Sterilwave 100 - Système de traitement des DASRI

By BERTIN TECHNOLOGIES

• Projection and mobility  
• Reconstruction of physical and cyber infrastructure  
• Medical support, physical and mental reconstruction, post-life human treatment

Sterilwave 100 is a compact, cost-effective solution for on-site medical waste management. Based on an eco-friendly, efficient microwave technology, Sterilwave 100 transforms bio-hazardous waste into unrecognizable and inert municipal waste in less than 30 minutes, with volume reductions up to 85% and weight reductions up to 25%. It allows safe, on-site treatment of up to 200L of biomedical waste per hour. Easy-to-use, to deploy and to maintain in operational conditions, Sterilwave 100 is the ideal solution for waste disposal in the field.

# THE CASE WHEEL LOADER

By CNH INDUSTRIAL FRANCE

- Reconstruction of physical and cyber infrastructure

The 621 wheel loader is part of the CASE F Series wheel loaders designed to ensure optimal performance even when using a high percentage of kerosene fuel (type F63). The 621F is equipped with a powerful FPT N67 engine with a maximum power of 172hp. Whether it's loading supplies, building fortifications, or participating in disaster relief operations, the 621F model can handle a wide range of tasks. Its custom military color ensures seamless integration into military operations.

# UAS crisis response service

By EXTENSEE

- Preparation and anticipation of mission
- First intervention
- Projection and mobility

As a drone operator (based on an airline model), we are able to deploy our drones and operators around the world, at very short notice, to intervene in any type of crisis (floods, fires, earthquakes, population displacements). Extensee can provide you with raw images, or images processed using artificial intelligence tools, to give you complete control over the evolution of the situation and enable you to make the best decisions for managing the current crisis.

# UBCO ROVER Two wheel drive lightweight electric motorcycle

By SAS TOAD

- First intervention
- Projection and mobility

The UBCO 2X2 is designed to tackle all terrains and quickly respond by carrying light intervention equipment such as rescue gear, deforestation tools, or extrication tools. With its rugged design, Super X aluminum frame, and two-wheel drive, this electric motorcycle offers optimal stability and traction on all types of terrain. Easy to handle and requiring only BSR training or a car license, this vehicle is perfect for equipping emergency services and civil protection.

## VIKING TENT-LIGHTING LED L212 230V AC

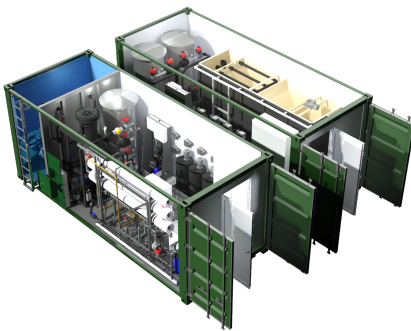

By TEKNOPROD AB

• Shelter and rest, human support

High output of light flow (in lumens 3700) compared to the small size of lighting. We made this lighting with a milky screen for the user's comfort. If the customer wants higher results, we can use the transparent screen. Usually, we manufacture lighting with the white natural light (4000°K). However, the lighting can be customized. This lighting fixture is very energy efficient. We recommend using VIKING Lighting L212 LED in all tents, temporary constructions, warehouses, and shelters or field hospitals. IP54 or IP65. Secondly, this lighting can be easily daisy-chained.

## Water treatment unit - UTE75

By NOVAKAMP

- Projection and mobility
- Subsistence, water treatment, and sanitation
- Reconstruction of physical and cyber infrastructure

Co-developed with SID/CETID, the UTE75 treats up to 90% of the world's freshwater. The UTE75 incorporates state-of-the-art technology to eliminate undesirable elements, as well as most organic and bacteriological pollutants. This equipment is also suitable for the retention of certain toxic substances. Features : - System in 2 20-foot containers - Deployable on site by 2 personnel in 3 hours- Flow rate = 100m<sup>3</sup> / day

MON ÉNERGIE

# PM1610B X-Ray and Gamma Radiation Personal Dosimeter

By POLIMASTER EUROPE UAB

- Preparation and anticipation of mission
- First intervention

PM1610 series of electronic personal dosimeters (EPDs) are intended for measurement of the personal dose equivalent  $H_p(10)$  and personal dose equivalent rate  $\dot{H}_p(10)$ . The dosimeters are suitable for multiple applications providing the measurement of X-ray (continuous and pulsed) and gamma radiation in the wide energy range. PM1610B model has an extended dose measurement range up to 20 Sv and improved accuracy of the dose rate measurement.

# PPO FOUR-CYLINDER FIRE-FIGHTING EQUIPMENT SYSTEM

By ECOTEST GROUP

- First intervention
- Projection and mobility
- Control center, networks, Energy, storage, Maintenance in Operational Condition (MCO)

The PPO fire-fighting equipment system is designed for detecting fire in the engine compartment of a special-purpose vehicle and its extinguishing in automatic or manual modes with light and audio signaling about the operating modes of this system. It generates electrical signals to control the components of fire protection equipment: audio and light alarms in case of a fire in the engine compartment and cyclogram of firefighting. The system is installed in special-purpose vehicles, including APCs, BMPs, and armored vehicles.
