

# **TRIKKE™**

**PROFESSIONAL MOBILITY**

## CAPABILITY STATEMENT

**TRIKKE TECH, INC.** designs and manufactures Personal Electric Vehicles in the USA since 2009, featuring proprietary 3-wheel drive and cambering technology with enhanced stability and maneuverability. The unique TRIKKE vehicles are engineered especially for the professional market, with rugged construction for continuous on/off-road use, all-weather reliability and endurance.

*TRIKKE Vehicles provide a mounted solution for covering large areas more efficiently than on foot, at less environmental impact and operational cost than driving an automobile, with added capability for transporting cargo.*

### Personal Electric Vehicles (PEV) for:

- Personnel Mobility
- Physical Security
- Perimeter Surveillance
- Mounted Patrol
- Maintenance Support
- Emergency Response
- Materiel Mobility (w/ trailer attachment)
- VIP Escort/Security

### Currently in use at:

- Norfolk, VA Police Department
- San Diego Airport and Harbor Police
- Sacramento County Sheriff
- Bay Area Rapid Transit Police
- UC Berkeley Police Department
- Department of Commerce
- D.C. Housing Authority
- Madigan Army Medical Center
- More than 100 additional domestic and international clients.

**Schedule**  
Contract # 47QSMA21D08NY

*Utility can be added to the vehicle in multiple modes, without compromising personal mobility: with a cargo box, toolbox, EMS kit - or a trailer that can be quickly connected to the Trikke vehicle to move supplies, tools, parts, packages, rescue and medical gear.*

*The trailer allows for many cart configurations: a generic flatbed or open/closed container models. TRIKKE Cargo System is smart and modular and can be extremely competitive when compared to ATV or golf cart solutions.*

## **SUPPORT**

TRIKKE offers on-site operational training and certification, 24/7 Tech Support, and warranty services.
