

SIMTAC

Chemical Threats Training

**EFFECTIVE
READINESS**

REAL-XT
REALISTIC X-TENSIVE TRAINING

SIMTAC provides a realistic, safe & non toxic effect, simulating Chemical Warfare Agents (CWAs) Used for Indoor Training

OUR SCOPE OF EXPERTISE

LACROIX's training solution provider for Military Armed Forces, including innovative SIMTAC Training aerosol for chemical attack simulation which can be used in a variety of contexts:

- CBRN Forces,
- Special Forces,
- Armies (Land, Navy, Air Forces),
- Civil Security,
- Bombers,
- Airports, Subway,
- Port authorities and major logistics hubs,
- Military complex,
- VIP / critical infrastructures (Congress, Space center, etc..),
- ...

SPECIFICATIONS

	Training aerosols spray for chemical threat exercise
Toxicity	Biodegradable NO RISKS FOR THE USER
Detection	Detectable immediately up to ~ 40min (at +21°C)
Detection systems	Type AP2C/AP4C/ AP4C+ Flame Spectrophotometry Technologie (FST) by PROENGIN
Proengin	
Volumes available	100ml
For indoor use	

Aerosol solution spray:

- No specific maintenance
- Detectors response to simulatant based on proximity and concentration.
